# The *EnduraShed*® Advantage...

*EnduraShed's greatest design improvement over competitive products is our innovative 5 Step Assembly sequence.*

*Satisfied EnduraShed® owners around the world will tell you that, from selection to ease of installation to durability to versatility, an EnduraShed® storage building is the obvious choice.*

From our convenient OTW-Shed®, which is installed next to an existing wall, to our remarkable EnduraShed® Extreme, which is designed to be installed in extreme weather (designed to withstand up to 60 lbs per square foot of snow), we've got the right shed, at the right price.

Simply put, our sheds are BETTER. Stronger steel. A painting process that is used to apply a protective zinc-alloy coating which adheres to the base steel for life. Add to that, a second coating of attractive, durable paint on our painted units.

Our **20 year warranty**, plus an easy **5 Step Installation** sequence, which is quicker and much easier than the competition, all delivered at surprisingly attractive prices, makes an EnduraShed® storage building just right for you.

## ***Ease of Installation...***

Just ask anyone who has assembled a competitive shed. Our easy, innovative **5 Step Assembly** sequence saves a lot of time and results in a stronger superior unit, without using hundreds of loose parts.

***Just some of the components used to assemble a competitive shed.***

**ScrewSAFE®**  
Structural Integrity

Every EnduraShed features the added strength and security of self tapping screws to ensure the greatest durability of your shed.

**EdgeSAFE®**  
Safer Handling

EnduraSheds all feature rolled safety edges on all components for easier, safer handling and a quality finish. EdgeSAFE provides protection both during assembly and throughout the shed's lifespan.

# OTW-Shed® (Off The Wall)

Included with your OTW-Shed

**Shed Ramp**  
Easy Wheeling

**Anchoring Kit**  
Structural Integrity

**Double Door\***  
Wider Access

**20 Year**  
Warranty

*This great little shed is designed to fit next to an existing wall or fence...no need for a concrete slab foundation.*

A 6' 5" rear wall height, which slopes to 5' 11" in front, directs water away from the house. This is the perfect shed for installation at the side of a structure, or inside a garage, for storing garden tools or other equipment. The 5' 11" front minimizes "head bumps" and makes "load in's" easier.

## Model: 0218EZ

- ▶ 5' x 3' x 6'5"
- ▶ Single hinged door
- ▶ Skillion roof
- ▶ Includes anchoring kit
- ▶ Includes shed ramp
- ▶ No concrete slab required

\* Double door not included

# EnduraShed® Extreme

*Built to handle the heaviest  
of snowfall up to 60lbs*

Included with your EnduraShed® Extreme

**Shed Ramp**  
Easy Wheeling

**Anchoring Kit**  
Structural Integrity

**20 Year**  
Warranty

*The EnduraShed® Extreme comes with an 8' high  
steeply pitched roof and peak finials.*

This shed is built for installation in extreme environments. It's ideal for use where there are heavy snowfalls and standing snow (up to 60 lbs. per square foot). The 8' tall, steeply pitched roof and peak finials set this building apart from the competition.

5' 11" walls allow easy entry. The roof color is off-white and the walls are slate gray. Assembly is easy, with our exclusive **5 Step Assembly** system and unique "snug fit" channels. Included are detailed installation instructions and illustrations.

Price includes an anchoring kit and shed ramp, for easy wheeling over base channel at entrance.

Model: 0600ES

#### Model: 0600E
